

## Q3 2019 COMPONENT LEAD-TIME AND PRICING TRENDS UPDATE

GROUP	TYPE	CURRENT LEAD TIME	LEAD TIME TREND	PRICING TREND	NOTES
Opto	LED's	4-16 weeks	↑	↔	Normal lead times and stable pricing.
Passives	Commodity Chip	8-16 weeks	↔	↔	Lead times normalising and pricing remains stable.
Passives	Tantalum and Elec	10-30 weeks	↔	↔	Stable but at high levels.
Passives	High Capacitance	6-26 weeks	↔	↔	Stabilising.
Crystals		8-16 weeks	↓	↔	Improving.
Memory	Commodity	6-36weeks	↑	↔	Generally stable.
Micro Controllers		8-36 weeks	↔	↔	Lead times stable with the exception of the 8/16bit micros from Infineon due mainly to EOLs.
Analogue/ Power	Commodity	8-12 weeks	↔	↔	Commodity lead times normalised and prices remain stable. High end still face some long lead times but getting better.
Power Discrete	Mosfets	8-38 weeks	↑	↔	Mosfet supply still critical.
Discrete	Zeners & Diodes	6-18 weeks	↔	↔	Stable across the board.
Discrete	Small Signal	6-20 weeks	↓	↔	Some lead time improvements seen. Pricing stable.
Logic	Logic	8-24 weeks	↔	↔	Xilinx standard lead time is 10 weeks. The lines that are over this are expected to be back to this level at the end of the month.
Power	Rectifiers	8-30 weeks	↔	↔	Stable, no change.
Interfaces	Interface	8-26 weeks	↔	↔	Stable.
Batteries	Rechargeable	12-14 weeks	↔	↔	Stable
